

Technology Services

SoftServe Technology Services

Technology and software applications are driving business transformation on an individual, cultural, and social level. As software becomes integral to the way we live, the boundary between our tools and intuition will vanish, but people will always be in control. As a leading global technology solutions company specializing in software product and application development, and services, SoftServe is driving this transformation.

Global Presence

28 Offices
Europe & USA

12 Countries
With SoftServe Clients

Foundation

1993 Over 20 Years
Delivering Innovation

Standard ISO 27001:2013

SoftServe Technology Services include:

- Data Science
- Big Data
- DevOps
- SAP and Enterprise Integration
- Architecture Assessment
- Security
- Internet of Things

Data Science team has just replaced me with an algorithm

Data Science

We specialize in:

- Unlocking business value in structured and unstructured data (data monetization)
- Boosting competitive advantage through adding machine learning capabilities to new or existing products
- Enriching client development teams with Data Science Expertise

Why SoftServe?

- State-of-the-art Machine Learning expertise in Predictive Analytics, Anomaly Detection, Recommendation Systems, Segmentation, and Cluster Analysis
- Artificial Intelligence expertise in Computer Vision, Speech Recognition, and NLP
- Certified Data Scientists and PhD graduates in Data Science

Partners:

Big Data is anything that crashes my Excel

Big Data

We specialize in:

- Designing and implementing state-of-the-art robust and scalable solutions to process mountains of data
- Creating interactive reports with deeper competitive insight, meaningful dashboards, and useful scorecards
- Enterprise data warehousing for consolidated views across the entire company and all business units

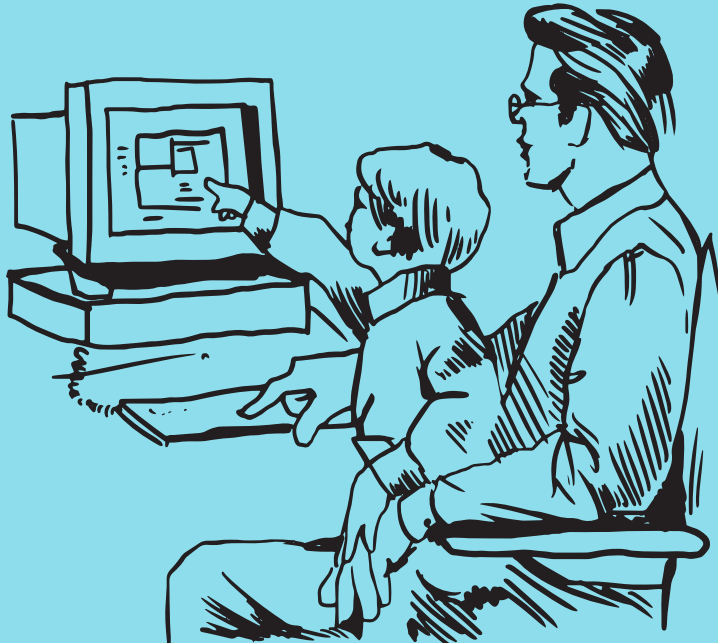

Why SoftServe?

- More than 100 Data Warehousing, Business Intelligence and Big Data projects successfully delivered to Fortune 100 and SMB companies by SoftServe's Certified Architects and Engineers
- Thought leadership in Big Data architecture and successful cooperation with world-renowned researchers (check out www.smartdecisionsgame.com)
- Lambda Architecture Accelerator – SoftServe's unique open-source project to deliver real-time processing solutions

Partners:

We heard you like Docker,
so our **DevOps** team put
a Docker in your Docker

DevOps

We specialize in:

- Accelerating time-to-market through development and deployment process automation
- Optimizing efficiency and lowering costs for your production environment
- Increasing velocity and agility of development teams through standardization and automation of SDLC

Why SoftServe?

- Operations and Infrastructure Management expertise in Public, Private and Hybrid Clouds, Big Data, Security and IoT
- Best practices and latest DevOps tools such as Chef, Ansible, Puppet, Docker, Mesos, Terraform, OpenStack and others
- Certified DevOps experts in AWS and Microsoft Azure Clouds

Partners:

What if I told you that
SAP is more complex than
the Matrix?

SAP and Enterprise Integration

We specialize in:

- Helping our clients to develop and implement SAP Integration strategies that meet their business needs
- Integrating legacy, Cloud, and third party systems (B2B, A2A integration)
- Providing SAP application development and managed services

Why SoftServe?

- Innovative approaches in functional consulting and development (SAP CRM, MM, SD, FI-CO, WM, SCM)
- Full life-cycle development and support (ABAP, PI/PO, BASIS) with exceptional dedication and service quality
- Certified SAP consultants

Partners:

They said they didn't need an **Assessment**

Architecture Assessment

We specialize in:

- Analyzing complex software systems for architectural risks, technical debt, and modernization capabilities
- Building architecture modernization/migration roadmaps supported by tradeoff and cost benefit analysis
- Shaping and evaluating strategic business decisions for software system modernization and replacement

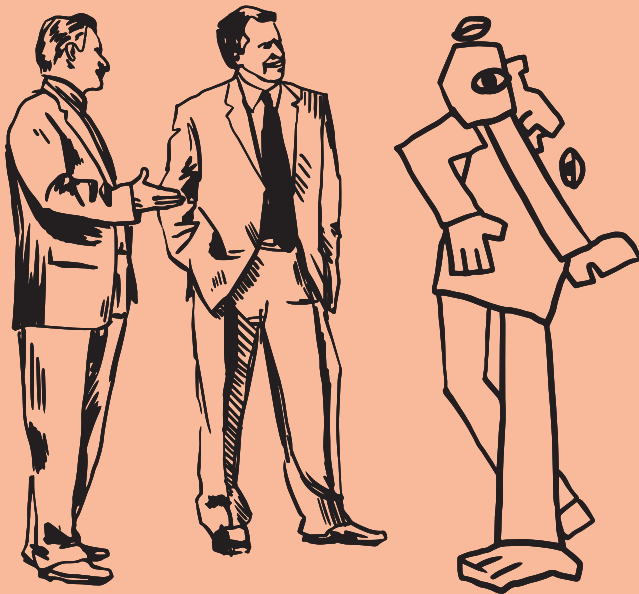

Why SoftServe?

- Excellent record of assessment execution for Fortune 100 and SMB companies
- Tight cooperation with international Technical Debt and Software Evaluation communities, representation on dedicated top international conferences: IEEE ICSME, SATURN, MTD Dagstuhl Seminar
- Highly skilled experts supported by an industry standard assessment methodology and analytical toolset

Cooperation:

That's our CIO. He's encrypted
for **Security** purposes

Security

We specialize in:

- Assessing and diagnosing solutions to improve security and validate for regulatory compliance
- Evaluating IT infrastructure security and identifying vulnerabilities
- Helping our customers properly respond to security incidents and build prevention plans

Why SoftServe?

- Our security service is tightly integrated into the software development lifecycle through establishing Secure Software Assurance program for our clients
- Meeting regulatory, industry or customer requirements (including PCI DSS, FISMA, GLBA, SOX, ISO 27001 or HIPAA)
- Certified ethical hackers and PhD graduates in Security

Partners:

Internet of Things is coming

Internet of Things

We specialize in:

- Enabling new business models through end-to-end IoT solution implementation
- Employing Distributed Sensor Networks to increase productivity and enable better asset utilization
- Transforming existing M2M/SCADA/WSN solutions for maximum security, interoperability, and data utilization

Why SoftServe?

- End-to-end experience with IoT ecosystems: embedded systems, device management, networking and communication, event stream processing, time-series data analytics
- Designed and implemented IoT solutions for world-class customers in industrial HVAC and appliances, energy, retail and consumer electronics domains
- Always on the cutting edge: active research and development in link-layer security for Wireless Sensor Networks, Multi-Agent Systems, Energy Harvesting

Partners:

About SoftServe

SoftServe is a leading technology solutions company specializing in software product and application development and services. Since 1993 we've been partnering with organizations, from start-ups to large enterprises, to help them accelerate growth and innovation, transform operational efficiency, and deliver new products to market.

Our experience stretches from Big Data/Analytics, Cloud, Security, and UX Design to the Internet of Things, Digital Health, and Digital Transformation. With offices across the globe and development centers across Eastern Europe, we measure our success by our clients' success.
